Hi Thor,

I'm out in the field today and just picked up your voice message about the petition to shutdown the NE area treatment system. I heard from Doug and Mat and they plan to provide me with their comments by 4/30/13. Doug indicated that he needed to discuss their draft comments at the next BOH meeting in mid April.

I've given it a quick look and thought it appears to be complete. I expect to get you comments shortly thereafter.

Derrick

Derrick,

Thanks. The April 30th date is fine with us.

Good morning Doug,

I've been meaning to contact you both about what kind of review time you and Mat would need regarding the petition to shutdown the Northeast Area Treatment System. I was going to ask if both the town and Acton Water District could provide us with comments back within 30 days. So if both you and Mat could provide your comments/thoughts on it to me by 4/30/2013, that would work. Mat, please let me know if that is acceptable timeframe for the AWD.

By the way, I've had EPA draft comments on the WR Grace 2012 annual groundwater monitoring report pulled together but I've been waiting to get comments from both Jen and the drinking water folks at MassDEP. I believe that the drinking water folks are going to request that Grace perform more frequent sampling for 1,4 Dioxane.

Derrick,

The Town is currently reviewing TetraTech's report. With Town Meeting taking up all next week it is unlikely that we will get direction from the Selectmen regarding our comments before April 15th. We are hoping that will fit your timeline for a decision. Please let me know if that date is a problem for EPA. Thanks.

Doug

Yes, she may have forgotten that — [REDACTED] I told her to just give me feedback on my email by end of this week. She'll be away next week and back on 4/1. I told her we would want her memo after she returns in early April. Okay?

Btw, she mentioned that Matt said that Acton BOH in favor of NE Area treatment system staying in operation, but Acton water dept in favor of shutting it down. I think you already know this, but thought I'd pass it along in case you didn't.

Jen,

Could Marielle wait until we speak before she finalized her memo?? Just in case we want to revise/add some MW's??

Hi Jen,

We thought you may also want to participate in this call with myself, Barb & Warren to go over the dioxane sampling at Grace.

How does your schedule look for Thursday morning of Monday or Tuesday afternoon next week?

Thanks Derrick.

Warren and I talked about this more today and I was planning to call you on Monday to see when we might want to schedule a conference call to go over our thoughts. Next week is wide open for me except Wednesday morning. Warren is going to send me his schedule before he goes home today.

Hi Derrick, I believe the below email (and attachments) is what you are looking for. I don't have a figure showing the individual Scribner well locations, but I do have the lab results. The 2nd attachment (page 11) has individual well result of 0.4 ppb. I want to clarify what I said to Marielle et al – I don't think we have data to show increasing concentrations -- b/c we just started to sample these 4 wells individually. Can't compare apples to oranges and need more individual well results to make that determination. I'll ask Marielle if she has any more data, but that is all I have. Jen

Happy New Year All,

Please find attached the latest round of 1,4-dioxane sampling results collected by the Water District in November 2012. This includes the four Scribner wells blended and individually.

If you have questions please let me know.

-Matt

Ok, good. Ugh the flu, snow. Sounds good.

I had a feeling that the town and AWD would take that oppsoing posistions. I think that the ROS said we would consult with the AWD and did not mention the town.

Talk to you soon.
